# EXHIBITION —●

Build Art Global specializes in providing full-spectrum services for exhibition stands, managing every aspect from initial design through to dismantling:

**Design Excellence:** Our team excels in creating bespoke designs tailored to each client's brand identity and marketing objectives.

**Craftsmanship and Fabrication:** We employ top-tier materials and meticulous craftsmanship to ensure stands are not only visually striking but also robust and functional.

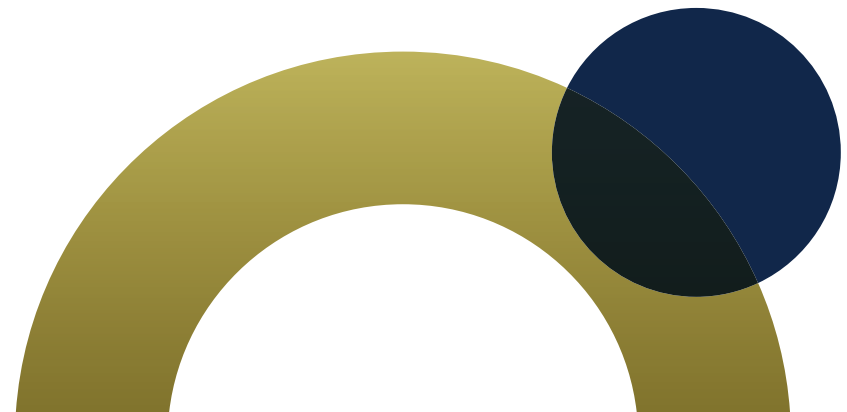

**Efficient Installation:** With expertise in logistics and on-site management, we ensure seamless installation and setup of stands at exhibition venues worldwide.

**Post-Event Dismantling:** After the exhibition concludes, our team handles dismantling with efficiency and care, managing the return of materials as needed.

**Client-Centric Approach:** Throughout the process, we prioritize clear communication, flexibility, and responsiveness to deliver exceptional results that exceed client expectations.

Build Art Global's commitment to quality, creativity, and client satisfaction is evident in every project we undertake, making us a trusted partner for showcasing brands at major trade shows and events globally.

# INTERIOR

## RESIDENTIAL

Comfortable and functional environments that reflect the homeowner's style and preferences. Key aspects include optimizing room layouts, selecting appropriate furnishings and decor, integrating practical and aesthetic elements, ensuring comfort and livability, and managing the project from design concept to final installation. The focus is on enhancing the quality of living while aligning with the client's vision for their home.

PHARMACY

## HEALTHCARE

The spaces prioritize in patient care, comfort, and functionality. Key considerations include optimizing layouts for efficient workflow, ensuring infection control measures, selecting durable and easy-to-clean materials, integrating calming and healing elements, complying with healthcare regulations, and creating a supportive environment for patients, staff, and visitors. The goal is to enhance the overall healthcare experience while maintaining a safe and hygienic environment conducive to healing and well-being.

# FOOD & BEVERAGE

Involves creating a welcoming space that meets health and safety standards, optimizes layout for dining and kitchen areas, selects appropriate furniture and decor, integrates branding elements, ensures compliance with regulations, and manages the project from concept to completion to deliver a pleasant dining experience for customers.

## LEISURE AND WELLNESS

Where people feel relaxed and healthy. It involves arranging the layout so it's easy to use, making sure the atmosphere is calm with nice colors and lighting, keeping everything clean and safe, and including areas for activities like yoga and fitness. The aim is to make spaces that help people relax and stay healthy in a peaceful setting.

# ● RETAIL

Stores that attract customers and make shopping easy and enjoyable. This involves arranging products so they are easy to see and find, using the store's colors and design to create a nice atmosphere, making sure there are places to sit and good lighting, organizing spaces efficiently for staff and storage, using technology like digital screens to help customers, and following rules to keep everyone safe. The goal is to make stores that people like to visit and where they want to buy things.

## COMMERCIAL OFFICE

A creating workplaces that are comfortable, efficient, and show what the company is about. This includes arranging desks and rooms so people can work well together, making sure everyone is comfortable with good chairs and lighting, using the company's colors and logos, having good technology for meetings and work, using materials that are good for the environment, making sure the space can change easily, and keeping everyone safe and healthy. The aim is to make a workspace where people can work well and feel good about being there.

# FACTORY AND PRODUCTION HOUSE

Designing a factory or production house means creating spaces where things are made efficiently and safely. This involves planning how materials and workers move around, making sure everything meets safety rules, setting up different areas for tasks like assembling and storing, installing the right machines and utilities, keeping everything easy to fix, and thinking about how the work affects the environment. The aim is to make a place where making things happens smoothly and safely.
